v.100

TABLE OF CONTENTS

		PAGE
Comparative anatomy of the Moraceae and their presumed allies (with sixty-three figures)	*Oswald Tippo*	1
Development and structure of the watermelon seedling (with forty-nine figures)	*Gayle N. Hufford*	100
Embryology of *Pisum sativum* (with thirty-one figures)	*D. C. Cooper*	123
Auxin distribution in seedlings and its bearing on the problem of bud inhibition (with ten figures)	*J. Van Overbeek*	133
Anatomy of auxin treated etiolated seedlings of *Pisum sativum* (with twenty-nine figures)	*Flora Murray Scott*	167
Growth and tropic responses of excised *Avena* coleoptiles in culture (with six figures)	*George S. Avery, Jr. and Carl D. LaRue*	186
Relation of environment and of the physical properties of synthetic growth substances to the growth reaction (with six figures)	*David M. Bonner*	200
Origin and development of shoots from the tips of roots of *Pogonia ophioglossoides* (with thirteen figures)	*Margery C. Carlson*	215
Vitamin B_1 and the growth of green plants (with two figures)	*James Bonner and Jesse Greene*	226
Protoplasmic structure in *Spirogyra*. III. Effects of anesthetics on protoplasmic elasticity (with one figure)	*Henry T. Northen*	238
Effectiveness of photoperiodic treatments of plants of different age	*H. A. Borthwick and M. W. Parker*	245
A micro-Kjeldahl method including nitrates	*Rufus H. Moore*	250
Embryology of certain Ranales (with eighteen figures)	*T. T. Earle*	257

		PAGE
Relation of soil temperature and nutrition to the resistance of tobacco to *Thielavia basicola* (with thirty-seven figures)	*Frances Louise Jewett*	276
Nitrogen and carbohydrate metabolism of kidney bean cuttings as affected by treatment with indoleacetic acid (with four figures)	*Neil W. Stuart*	298
The American sugar maples. I. Phylogenetic relationships, as deduced from a study of leaf variation (with five figures)	*Edgar Anderson and Leslie Hubricht*	312
Notes on some plant remains from the Carboniferous of Illinois (with nineteen figures)	*Fredda D. Reed*	324
Nitrogen nutrition and nicotine synthesis in tobacco (with one figure)	*Ray F. Dawson*	336
Histological responses of cabbage plants grown at different levels of nitrogen nutrition to indole(3)acetic acid (with ten figures)	*Ethel Goldberg*	347
Pits in the hapteres of *Nereocystis* (with five figures)	*Harriet W. Englerth*	370
Photoperiodic perception in Biloxi soy beans (with one figure)	*H. A. Borthwick and M. W. Parker*	374
Photoperiodism in relation to hormones as factors in floral initiation and development (with eleven figures)	*Karl C. Hamner and James Bonner*	388
Translocation of carbohydrates in the Cuthbert raspberry (with four figures)	*Charles J. Engard*	439
Experiments on the transport of auxin (with ten figures)	*F. W. Went and Ralph White*	465
Cytology of dormancy in *Phaseolus* and *Zea* (with nineteen figures)	*Frederic G. Middendorf*	485
Effects of indoleacetic and naphthylacetic acids on development of buds and roots in horseradish (with fourteen figures)	*Robert C. Lindner*	500
Cytological studies in relation to the classification of the genus *Calochortus* (with forty figures)	*J. M. Beal*	528

		PAGE
Distribution and hybridization of *Vernonia* in Missouri (with seven figures)	*Cora Shoop Steyermark*	548
Atavistic leaf forms of various species of trees (with twenty-three figures)	*Elizabeth S. Oliver*	563
Major changes in grassland as a result of continued drought (with nine figures)	*J. E. Weaver and F. W. Albertson*	576
Increasing the fertility of *Neurospora* by selective inbreeding (with one figure)	*Carl C. Lindegren, Virginia Beanfield, and Roberta Barber*	592
Phloem development and flowering (with eighteen figures)	*B. Esther Struckmeyer and R. H. Roberts*	600
Nitrogen nutrition in relation to photoperiodism in *Xanthium pennsylvanicum* (with one figure)	*Edith K. Neidle*	607
Studies of protoplasmic structure in *Spirogyra*. IV. Effects of temperature on protoplasmic elasticity (with one figure)	*Henry T. Northen*	619
Growth and metabolism of bean cuttings subsequent to rooting with indoleacetic acid (with six figures)	*John W. Mitchell and Neil W. Stuart*	627
Effect of photoperiod on development and metabolism of the Biloxi soy bean (with seventeen figures)	*M. W. Parker and H. A. Borthwick*	651
Phloem of white pine and other coniferous species (with forty-seven figures)	*Lucy B. Abbe and A. S. Crafts*	695
Histological study of the developing fruit of the sour cherry (with eight figures)	*H. B. Tukey and J. Oran Young*	723
Plant succession on granite rock in eastern North Carolina (with nine figures)	*Henry J. Oosting and Lewis E. Anderson*	750
Structure of some Carboniferous seeds from American coal fields (with twenty-seven figures)	*Fredda D. Reed*	769

PAGE

Transplantation experiments with peas. II (with four figures) - - - - - - - - - - *H. E. Hayward and F. W. Went* 788

Colorimetric methods for the quantitative estimation of indole(3)acetic acid (with three figures) *John W. Mitchell and B. C. Brunstetter* 802

Relation between chromosome number and stomata in *Coffea* (with two figures) - - - *Coaracy M. Franco* 817

Effect of calcium deficiency on respiration of etiolated seedlings - - - - - - - - - *Wendell R. Mullison* 828

Vitamin B_1 in relation to meristematic activity of isolated pea roots (with eleven figures) - *Fredrick T. Addicott* 836

Vitamins and the germination of pollen grains and fungus spores (with two figures) - - *William C. Cooper* 844

Photoperiodic responses of dill, a very sensitive long day plant (with three figures) - - - *Karl C. Hamner and Aubrey W. Naylor* 853

Development of megagametophyte in *Erythronium albidum* (with sixteen figures) - - - *D. C. Cooper* 862

Effect of certain growth substances on inflorescences of dates (with one figure) - - - *Roy W. Nixon and F. E. Gardner* 868

CURRENT LITERATURE - - - - - - - 253, 432, 690, 872

For titles of book reviews see index under author's name
